DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 66-93, drawn to a product.

Group II, claim(s) 94-125, drawn to a process.

2. Evidence of lack of unity between the two groups is found in Guhl et al (6463706) wherein it is found to disclose the features of instant claim 66 (i.e. a hollow spacer with sealing compound on both sides thereof and a drying agent on the inside of the spacer in figures 10 and 12). As such, the special technical features of the claimed invention are not found to define a contribution over the prior art.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
